

VAMSHI KRISHNA KEERTHI

Chicago, Illinois | 3128687895 | Keerthivamshikrishna3@gmail.com | <https://www.linkedin.com/in/vamshikeerthi/>

SUMMARY

Data Analyst with 4+ years of experience across BCBS, Cognizant, and Tata Consultancy Services, specializing in healthcare and banking analytics, SQL, Python, Power BI, Tableau, machine learning, and Generative AI. Delivered data-driven solutions spanning claims intelligence, financial analysis, dashboarding, data quality, and AI-assisted insights. Contributed to 8+ analytical workflows supporting operational reporting, business requirements, predictive modeling, and cross-functional decision-making across consulting and enterprise environments.

PROFESSIONAL EXPERIENCE

- Data Analyst – Generative AI | BCBS | Chicago, Illinois

February 2026 – Present

 - Analyzed 30K+ healthcare claims, member, provider, eligibility, and encounter records using SQL, Python, and Pandas to identify utilization trends, cost drivers, anomalies, and data-quality gaps.
 - Built 10+ Power BI dashboards and recurring analytical reports covering claims activity, member utilization, provider performance, and financial metrics for cross-functional stakeholders.
 - Implemented 5+ Generative AI and LLM-based workflows for data summarization, unstructured-data classification, natural-language insights, and recurring analytical reporting across healthcare use cases.
 - Validated 8+ AI-assisted analytical use cases by comparing LLM outputs with SQL-derived results, source datasets, and business rules to identify inconsistencies and improve output quality.
- Data Analyst | Cognizant | Hyderabad, India

May 2022 – December 2023

 - Assessed 250K+ customer, account, transaction, and product records using SQL and Python to identify behavioral trends, transaction anomalies, revenue drivers, and financial risk indicators supporting banking operations.
 - Investigated customer activity, payment behavior, account characteristics, and historical transaction data through exploratory and statistical analysis to uncover patterns influencing banking and financial outcomes.
 - Engineered analytical datasets through feature engineering, data cleansing, missing-value treatment, outlier analysis, and transformation of transaction and account-level attributes for downstream analytics.
 - Applied 6+ machine learning models for customer segmentation, transaction classification, anomaly detection, and predictive risk analysis across banking use cases.
 - Visualized 20+ banking and operational KPIs through Tableau dashboards covering customer activity, transaction performance, account trends, and risk indicators.
 - Coordinated with 12+ risk, operations, and business stakeholders to translate analytical findings and model outputs into actionable recommendations supporting financial-services processes.
- Data Analyst | Tata Consultancy Services | Hyderabad, India

September 2020 – April 2022

 - Extracted 40K+ healthcare utilization, enrollment, provider, and encounter datasets through SQL and Python, uncovering analytical patterns and insights to support consulting engagements and client decision-making.
 - Translated 6+ client requirements into KPI definitions, business rules, data mappings, and analytical specifications aligned with healthcare reporting needs.
 - Created Power BI dashboards tracking claims utilization, member activity, provider performance, and healthcare operational KPIs for consulting and client stakeholders.
 - Diagnosed data-quality issues through SQL-based profiling, reconciliation, duplicate checks, null-value analysis, and exception investigation to improve reporting reliability.
 - Automated recurring reporting and data-preparation workflows using SQL, Python, and Excel to streamline analytical deliverables for consulting projects.
- Data Analyst Intern | Tata Consultancy Services | Hyderabad, India

March 2020 – August 2020

 - Compiled healthcare transaction, enrollment, provider, and coverage data using SQL and Excel, supporting data preparation, basic trend analysis, and recurring reporting activities for healthcare consulting projects.
 - Verified data fields and reporting outputs through data-quality checks, reconciliation, and basic validation while assisting with Power BI reports and analytical deliverables for client-facing healthcare engagements.

TECHNICAL SKILLS

Programming & Querying: SQL, Python, Pandas, Excel
Data Analytics: Exploratory Data Analysis, Statistical Analysis, Data Cleaning, Data Profiling, Data Validation, Data Reconciliation, Outlier Analysis, Missing-Value Analysis, Feature Engineering, Data Transformation
Business Intelligence & Visualization: Power BI, Tableau, KPI Development, Dashboard Development, Analytical Reporting, Data Visualization
Machine Learning: Machine Learning, Customer Segmentation, Classification, Anomaly Detection, Predictive Analysis
Generative AI: Generative AI, Large Language Models (LLMs), Natural Language Insights, Unstructured Data Classification, AI-Assisted Analytics
Healthcare Analytics: Healthcare Claims Analytics, Member Analytics, Provider Analytics, Eligibility Analysis, Encounter Data Analysis, Healthcare Utilization Analysis
Financial & Banking Analytics: Banking Analytics, Transaction Analytics, Customer Analytics, Account Analytics, Financial Risk Analysis, Payment Behavior Analysis
Requirements & Data Management: Requirements Gathering, Business Rules, KPI Definitions, Data Mapping, Reporting Specifications, Data Quality Management, Root-Cause Analysis
Reporting & Automation: Recurring Reporting, Data Preparation, Reporting Automation, Excel-Based Reporting

EDUCATION

Governors State University | Master of Science in Computer Science | Chicago, IL

January 2024 – December 2025
